

Havatech

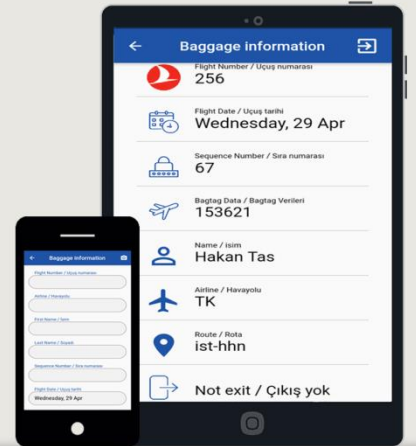

Baggage Storage Application

Overview

Havatech Baggage Storage Application is designed to enable airlines and ground handlers to manage and track any delayed, or missed baggage in the airport. Such baggage' information can be saved in the application by scanning the bag tag. Users can extract different reports from those baggage based on the name of the airline, city, and flight number. Whenever baggage is delivered to a customer it belongs to, it is possible to see the time, date, station, and user that brings out the left baggage of storage.

Features

- ✓ Custom & diverse reports from the storage for every station
- ✓ Graphical User Interfaces are simple, intuitive and easy to learn
- ✓ Get real-time insight into baggage status everywhere at any time
- ✓ Access to data from the corresponding panel on tablet, PC, smartphone, etc
- ✓ Providing very easy to use and rapid tool for entering/exiting baggage to the storage
