

Havatech

Damaged Baggage Application

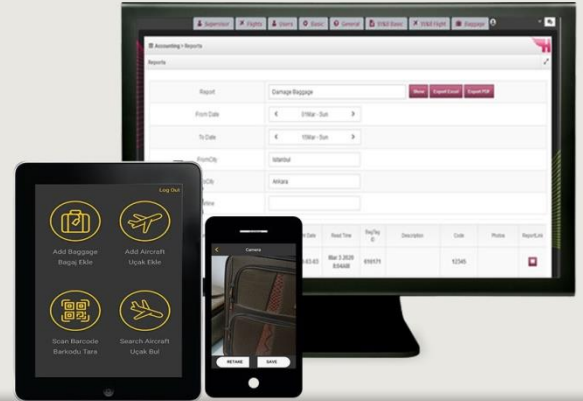

Overview

Havatech Damaged Baggage application allows you to report and manage damage of your flights. By Havatech application you can inspect the damaged baggage, make a report and file passengers' claim at airports.

Each airline has a baggage policy through which it can determine different types of baggage damage. Airlines will pay for compensation based on the damage's type and their repair and/or reimbursement offers. When a passenger asks for compensation, you can take a picture of his or her damaged baggage and then scan his/her boarding pass barcode using our application on your phone or tablet; consequently, the damaged baggage will automatically be saved and filed for you.

Features

- ✓ Damaged baggage application is developed for both **Android** and **iOS** phones.
- ✓ Report damaged baggage to the airport Baggage Service Office, immediately after submitting the claim form.
- ✓ Retrieve damaged baggage information by scanning passengers' boarding pass barcode.
- ✓ Fill out a damage claim form or Property Irregularity Report with baggage picture.
